ABOUT US

Established in 1996 & spread over 5700 sq. meters in commercial centre of Panchkula, Sukata has taken firm steps forward from the very beginning in line with its mission and vision, towards being a leading company which continuously grows and increases its market share.

At Sukata, we offer credible services, infrastructure and proven capability to cater to extensive demand of various kinds of seating systems & critical fabrication for both tractor & Railway coach industry.

Empowered with approved source status for supply of EN compliant PU foam, we are very well placed to supply complete set of Seat & Berths for all kinds of coaches of Indian Railways. In fact, we are one of the first companies in India to develop & supply Berths for Amrit Bharat coaches, introduction of which is said to be beginning of new era of affordable rail travel in India.

With over 100 types of seats in our product portfolio and major share in all tractor driver seats being supplied to our biggest customer International Tractors Limited ('SONALIKA' brand) along with a very capable in house R&D team, we offer to design, develop & supply any kind of seat as per customer requirements and specification. Our other customers for Driver seat includes Gromax Agri Equipment Ltd (Formerly known as Mahindra Gujarat Tractor Ltd.), Captain Tractor, Same DEUTZ-FAHR, etc.

Currently, almost 1/4th of our sales comes from Indian Railways & rest from Tractor Industry. Considering the kind of funding Indian Government is devoting towards expansion & up gradation of Indian Railways, there is a huge potential for players like us who have established their performance over past many years & in process have acquired various critical approvals required to bag major orders.

Sukata has grown strength-by-strength in the auto industry as a respectable manufacturer and supplier of automotive seating systems. Facilitated with in-house PU foaming plant and advanced powder coating facilities, we are able to manufacture our vast array of products within the stipulated time frame.

Buoyed by our recent foray in export market specifically for seats of lawn mowers & Zero Turn Radius (ZTR) vehicles and with installed capacity to supply 15K tractor driver seats & 50 Coach sets of Seat & Berths every month. We are committed to expanding strong, long-term partnerships across global markets.
